

Also mobile and finding applications in industrial environments are mini crawler cranes. The 350E4 and 8700E are two models from Kegiom in Italy that are often used in industry. A primary feature is their small dimensions allowing access in tight areas. The 350E4 is 0.75 m wide, 1.99 m long and 2.04 m high. The 8700E is 1.30 m wide, 3.70 m long and 2.30 m high.

In its domestic market Kegiom says the majority of business is rental while in other countries it is sales, especially in Germany and Belgium. Typical buyers and hirers include small and medium building contractors, machinery maintenance firms, and the agricultural sector. In development Kegiom has a new model that will have pick and carry duties. ■
